

Alert Bands

In case of known or new risk on a patient, suggests the use of an additional colour coded wristband with the kind of risk printed text: Healthcare colour coded Alert bands feature highly-visible, color-specific identification alerts to warn caregivers of special precautions. They're a quick, easy, and cost-effective way to meet state standardization. All alert wristbands and snaps are latex-free. Custom alert logos can be printed on wristbands

RED=Allergy

Red means stop. Caregivers will be alerted to stop and check medical record to see if the patient is allergic to the medication, food or treatment.

YELLOW=Fall risk

Yellow is a warning to slow down, pay attention and take special precautions. A yellow wristband communicates that the person needs to be assisted.

PURPLE=Do not resuscitate

A purple wristband alerts the hospital staff to check the patient record for important information on patient end-of-life directives. If you don't want to use an additional wristband, there is Alert Color Coded Snaps, all-in one solution:

Provide convenience by allowing caregivers to classify multiple patient conditions - all on one wristband!
